Multiple Intelligences Howard E. Gardner, 1993 Howard Gardner's brilliant conception of individual competence is changing the face of education today. In the ten years since the publication of his seminal *Frames of Mind*, thousands of educators, parents, and researchers have explored the practical implications of Multiple Intelligences (MI) theory—the powerful notion that there are separate human capacities, ranging from musical intelligence to the intelligence involved in understanding oneself. *Multiple Intelligences: The Theory in Practice* brings together previously published and original work by Gardner and his colleagues at Project Zero to provide a coherent picture of what we have learned about the educational applications of MI theory from projects in schools and formal research over the last decade.

Last Night I Dreamed of Peace Dang Thuy Tram, 2007-09-11 At the age of twenty-four, Dang Thuy Tram volunteered to serve as a doctor in a National Liberation Front (Viet Cong) battlefield hospital in the Quang Ngai Province. Two years later she was killed by American forces not far from where she worked. Written between 1968 and 1970, her diary speaks poignantly of her devotion to family and friends, the horrors of war, her yearning for her high school sweetheart, and her struggle to prove her loyalty to her country. At times raw, at times lyrical and youthfully sentimental, her voice transcends cultures to speak of her dignity and compassion and of her challenges in the face of the war's ceaseless fury. The American officer who discovered the diary soon after Dr. Tram's death was under standing orders to destroy all documents without military value. As he was about to toss it into the flames, his Vietnamese translator said to him, "Don't burn this one. . . . It has fire in it already." Against regulations, the officer preserved the diary and kept it for thirty-five years. In the spring of 2005, a copy made its way to Dr. Tram's elderly mother in Hanoi. The diary was soon published in Vietnam, causing a national sensation. Never before had there been such a vivid and personal account of the long ordeal that had consumed the nation's previous generations. Translated by Andrew X. Pham and with an introduction by Pulitzer Prize winner Frances FitzGerald, *Last Night I Dreamed of Peace* is an extraordinary document that narrates one woman's personal and political struggles. Above all, it is a story of hope in the most dire of circumstances—told from the perspective of our historic enemy but universal in its power to celebrate and mourn the fragility of human life.

Britain and the Puzzle of European Union Andrew Duff, 2021-09-27 This book is a study of the complex relationship between Britain and Europe from the Second World War to the present day. Drawing on first-hand experience of British and European politics, the author highlights not only the dramatically shifting power play between London and Brussels but also the EU's own struggle to come to terms with its federal mission. He traces the important constitutional events that have fashioned the EU, of which the Brexit process is an outstanding example. The author proposes a number of constitutional reforms which, if carried through, would form the basis of a new entente between the EU and the UK. Both polities will profit from stronger democratic government of a federal type. The author advocates spanning the divide between NATO and the EU. He proposes installing a new class of affiliate EU membership, which may be useful for the whole European neighbourhood, including the UK. Featuring the history, present and future of Britain's relationship with the European Union, the book will be of worldwide interest to students and practitioners of European integration, as well as diplomats and journalists. It is the first comprehensive manifesto for the future of Europe and Britain since Brexit.

Functional Food Product Development Jim Smith,Edward Charter,2011-03-08 According to an August 2009 report from PricewaterhouseCoopers, the United States market for functional foods in 2007 was US\$ 27 billion. Forecasts of growth range from between 8.5% and 20% per year, or about four times that of the food industry in general. Global demand by 2013 is expected to be about \$100 billion. With this demand for new products comes a demand for product development and supporting literature for that purpose. There is a wealth of research and development in this area and great scope for commercialization, and this book provides a much-needed review of important opportunities for new products, written by authors with in-depth knowledge of as yet unfulfilled health-related needs. This book addresses functional food product development from a number of perspectives: the process itself; health research that may provide opportunities; idea creation; regulation; and processes and ingredients. It also features case studies that illustrate real product development and commercialization histories. Written for food scientists and technologists, this book presents practical information for use in functional food product development. It is an essential resource for practitioners in functional food companies and food technology centres and is also of interest to researchers and students of food science. Key features: A comprehensive review of the latest opportunities in this commercially important sector of the food industry Includes chapters highlighting functional food opportunities for specific health issues such as obesity, immunity, brain health, heart disease and the development of children. New technologies of relevance to functional foods are also addressed, such as emulsion delivery systems and nanoencapsulation. Includes chapters on product design and the use of functional ingredients such as antioxidants, probiotics and prebiotics as well as functional ingredients from plant and dairy sources Specific examples of taking products to market are provided in the form of case studies e.g. microalgae functional ingredients Part of the Functional Food Science and Technology book series (Series Editor: Fereidoon Shahidi)

Applying Cognitive Linguistics Ana María Piquer-Píriz, Rafael Alejo-González, 2018-08-03 In recent years, Cognitive Linguistics (CL) has established itself not only as a solid theoretical approach but also as an important source from which different applications to other fields have emerged. In this volume we identify some of the current, most relevant topics in applied CL-oriented studies – analyses of figurative language (both metaphor and metonymy) in use, constructions and typology –, and present high-quality research papers that illustrate best practices in the research foci identified and their application to different fields including intercultural communication, the psychology of emotions, second and first language acquisition, discourse analysis and translation studies. It is also shown how different methodologies –the use of linguistic corpora, psycholinguistic experiments or discourse analytic procedures– can shed some light on the basic premises of CL as well as providing insights into how CL can be applied in real world contexts. Finally, all the studies included in the volume

are based on empirical data and there are some analyses of languages other than English (Japanese, Russian, Spanish, Danish, German and Polish), thus overcoming the contentions that CL-theoretically-based research is often based on linguistic intuition and focused only on the English language. We hope that the present volume will not only contribute to a better understanding of how CL can be applied but that it will also help to encourage, even further, more robust empirical research in this field. Originally published as a special issue of *Review of Cognitive Linguistics* 14:1 (2016).

East Eats West Andrew Lam, 2010 From cuisine and martial arts to sex and self-esteem, *East Eats West* shines new light on the bridges and crossroads where two hemispheres meld into one worldwide immigrant nation. In this new nation, with its amalgamation of divergent ideas, tastes, and styles, today's bold fusion becomes tomorrow's classic. But while the space between East and West continues to shrink in this age of globalization, some cultural gaps remain. In this collection of twenty-one personal essays, Andrew Lam, the award-winning author of *Perfume Dreams*, continues to explore the Vietnamese diaspora, this time concentrating not only on how the East and West have changed but how they are changing each other. Lively and engaging, *East Eats West* searches for meaning in nebulous territory charted by very few. Part memoir, part meditation, and part cultural anthropology, *East Eats West* is about thriving in the West with one foot still in the East.
